

“TriGas Latin America enjoys an excellent reputation for quality and service to helium, medical and industrial gas markets”

The Helium Balloon Division – under its registered trademark GLOBAL BALAO BALLOON® – offers helium filled disposable cylinders with fill nozzles. The disposable cylinders are in a decorative box and available with or without balloons. Lightweight aluminium and steel helium cylinders of different sizes are available. As one of only a few suppliers of disposable helium cylinders, TriGas Latin America offers its customers the ability to product differentiate with competitive conditions.

The Specialty Gas Division offers UHP certified helium and is staffed by experienced engineers in the installation and servicing of laboratory gas distribution networks and equipment. Pure gases, mixtures, hydrocarbons and EPA Protocol Gases are available in portable cylinders and steel cylinders.

Meanwhile, the Industrial Gas Division offers hydrocarbons, refrigerant and atmospheric gases in both bulk and cylinder supply. A fleet of DOT-certified ISO tanks and high pressure tube trailers offers bulk delivery to all countries. Disposable refrigerant cylinders are available under the TGLA registered trademark brand.

Partnership programme

TriGas Latin America successfully initiated its partnership programme in 2014. The company has developed various joint programmes to service the different markets and also offers assessment programmes to ensure optimal operations throughout.

Tri-Gas Latin America

TriGas Latin America has been in business since 1990, providing exceptional customer service, specialising in direct source supply of liquid and gaseous helium, argon, hydrocarbons and refrigerants in bulk and cylinders, with certified purities. Serving the Caribbean, Central and South America regions, with import and distribution capabilities in the major countries, TriGas Latin America delivers direct to your doorstep. It also offers ex-works from its warehouse distribution sites in Miami and Houston (US).

Founded to address the market trade-off between competitive pricing and poor service, TriGas Latin America provides the service and friendliness of a family-held company with the pricing of a major multinational. Its staff is seasoned, multi-lingual, highly trained engineers that live and work in the local community. The company services companies and distributors of various sizes, including major institutions.

TriGas Latin America enjoys an excellent reputation for quality and service to the helium, medical and industrial gas markets. It has major investments in new storage and delivery

equipment, which permits quick and direct delivery to the end-user. The company is a leading direct supplier of liquid helium, avoiding triangular service, thereby assuring fast and timely delivery of ISO certified quality product.

The company’s MRI Division offers MATHESON-certified quality liquid helium, while its large inventory of new FAA-certified liquid helium dewars assure customers of immediate equipment availability, in optimal conditions, thereby minimising losses. With expertise in transfills and the tools to service all major MRI machines, its team of certified technicians provide total service. Various major manufacturers, hospitals and laboratories are able to attest to its service and expertise.

TriGas Latin America’s Gaseous Helium Division provides all purities from fly balloon to ultra high purity (UHP) and offers gaseous helium in all cylinder types from disposable to steel and aluminium. For higher volume usage, the company offers skid-mounted cylinders or high pressure tubes serviced by its fleet of DOT certified high pressure ISO tube trailers.
